

Unit 3 | Chapter 5: The Bones (HTML Foundations)

Learning Targets:	
❖ Technical: I can construct a valid HTML5 document using the mandatory boilerplate elements (<!DOCTYPE>, <html>, <head>, <body>). (NV 5.1.1) ❖ Technical: I can utilize Semantic HTML5 tags (<header>, <nav>, <main>, <section>, <article>, <footer>) to create a clear document outline. (NV 5.1.4) ❖ Technical: I can implement text-level semantics including headings (h1-h6), lists (ordered/unordered), and hyperlinks with absolute and relative paths. (NV 5.1.2) ❖ Technical: I can build accessible HTML forms using <label>, <input>, and <button> with correct attribute mapping. (NV 5.1.3) ❖ Employability: I can demonstrate analytical reasoning to troubleshoot syntax errors such as unclosed tags or incorrect nesting. (WRS 1.2.3) ❖ Employability: I can demonstrate professional decorum and diligence by following industry-standard indentation and lowercase naming conventions. (WRS 1.1.1, 1.1.4)	
Compelling Question:	
How does a developer use semantic structure to provide meaning to raw information, ensuring it is understandable by both humans and machines?	
Score	Performance Indicators
4.0	I can: ☐ Design and code a complex, multi-section semantic layout that achieves a perfect score on a technical accessibility audit (WCAG), demonstrating advanced systematic resolution. (NV 5.1.4, WRS 1.2.3) ☐ Architect a multi-input form that utilizes advanced attributes (required, pattern, placeholder) and fieldsets to optimize the user journey, demonstrating profound cultural competency. (NV 5.1.3, WRS 1.1.5) ☐ Mentor peers by performing "Code Reviews" to identify and correct structural logic flaws. (WRS 1.1.4)
3.5	In addition to score 3.0 performance, partial success at score 4.0 content.
3.0	I can: ☐ Build a complete semantic skeleton for a website featuring a functional navigation menu and organized content sections. (NV 5.1.4) ☐ Correctly implement ordered and unordered lists and map attributes like alt, href, and target. (NV 5.1.2) ☐ Nest HTML elements with 100% accuracy, demonstrating diligence in code 

	organization. (WRS 1.1.1) ☐ Create an accessible contact form with matching labels and IDs. (NV 5.1.3) ☐ Demonstrate punctuality by submitting validated, error-free code files on schedule. (WRS 1.1.1)
2.5	No major errors or omissions regarding score 2.0 content, and partial success at score 3.0 content.
2.0	I can ☐ Define common terminology and identify syntax: (WEB.4.2.1) ☐ Tag, Element, Attribute, Boilerplate, Semantic vs. Non-semantic, <a>, , , <h1>, <p>, <div>, , <form>, <label>. ☐ Identify the importance of punctuality (WRS 1.1.1), probity in source code (WRS 1.1.2), professional decorum (WRS 1.1.4), and applying analytical reasoning to syntax (WRS 1.2.3).
1.5	Partial success at score 2.0 content, and major errors or omissions at 3.0.
1.0	With help, partial success at score 2.0 and score 3.0 content.
0.5	With help, partial success at score 2.0 but not at score 3.0 content.
0.0	Even with help, no success or attempt made.
