

Unit 1 | Chapter 2: The Rules (Ethics, Law & Accessibility)

Learning Targets:	
❖ I can differentiate between Intellectual Property types (Copyright, Trademark, Patent) and apply Creative Commons licenses (BY, NC, ND). ❖ I can compare international and local privacy laws, including GDPR (Opt-In) and Nevada SB220 (Opt-Out). ❖ I can describe the technical process of web security, including the 8-step SSL/TLS handshake and Certificate Authorities. ❖ I can implement the "POUR" principles of accessibility and meet WCAG Level AA standards (Contrast, Alt-Text, Keyboard Nav). ❖ I can identify and avoid unethical design practices like Dark Patterns and Algorithmic Bias.	
Compelling Question:	
How does a developer protect themselves, their users, and their employers while building an internet that is fair, secure, and accessible to everyone?	
Score	Performance Indicators
4.0	I can: ☐ Evaluate a training dataset to identify and mitigate Algorithmic Bias before it impacts a live application. (WEB.3.2.4) ☐ Perform an Accessibility Audit on a complex site to identify Dark Patterns and resolve color contrast failures below the 4.5:1 ratio. (WEB.3.2.3) ☐ Architect a "Privacy by Design" strategy for a global startup that balances GDPR compliance with the Right to be Forgotten. (WEB.3.1.2) ☐ Defend the use of specific media assets under Fair Use or identify when a Patent is required vs. automatic Copyright. (WEB.1.2.1)
3.5	In addition to score 3.0 performance, partial success at score 4.0 content.
3.0	I can: ☐ Implement the POUR principles to ensure a site is Operable via keyboard and Perceivable via screen readers (Alt Text). (WEB.3.2.2) ☐ Explain the 8-step SSL/TLS Handshake and the difference between "Postcard" (HTTP) and "Armored Letter" (HTTPS) security. (WEB.3.1.1) ☐ Apply correct Creative Commons tags (BY, NC, ND) to a project and distinguish between Work Made for Hire and Public Domain. (WEB.1.2.1) ☐ Utilize Personas (like Competitive Cody or Impatient Ian) to justify design decisions regarding Persistence and Page Speed. (WEB.3.2.1) 

	☐ Differentiate between Hashing (one-way) and Encryption (two-way) for protecting PII. (WEB.3.1.2)
2.5	No major errors or omissions regarding score 2.0 content, and partial success at score 3.0 content.
2.0	I can ☐ Define common terminology and identify syntax: (WEB.4.2.1) ☐ Copyright, Trademark, Patent, Creative Commons (BY, NC, ND), PII, Digital Footprint, SSL/TLS, GDPR vs. SB220, ADA, WCAG Level AA, a11y, POUR, Alt Text, Curb Cut Effect, NDA, Trade Secrets, and Dark Patterns.
1.5	Partial success at score 2.0 content, and major errors or omissions at 3.0.
1.0	With help, partial success at score 2.0 and score 3.0 content.
0.5	With help, partial success at score 2.0 but not at score 3.0 content.
0.0	Even with help, no success or attempt made.
